PROGRAMMING

Languages: JavaScript, PHP, Java

Full Stack: HTML, CSS, ReactJS, GraphQL, Gatsby, MySQL, Tailwind

Other: Android SDK, Git, JUnit, Figma, Adobe Suite

EXPERIENCE

Qtac Solutions Ltd

Bristol, UK

Technical Support Engineer

September 2016 – March 2018

- Providing first-line support for a SaaS payroll package, via phone, email or remote connection. This involved tackling and fixing IT issues, and also payroll issues.
- The customer support would vary each day from teaching the end-user how the software works; general computer support such as setting permissions for the software and SQL database work; to amend erroneous data held in the customer's payroll system; to general payroll queries such as checking why an employee isn't being enrolled into an auto enrolment workplace pension scheme.
- I also worked on improving the companies website, making changes to optimize it for a better UX, and converting their existing end-user knowledge base to a modern platform.

PROJECTS (IN DETAIL ON HWBUK.ME)

QS Books Archive Catalogue

May 2021

- A full-stack web application built for a book publisher to allow them to keep an accessible catalogue platform for their archive of publications. (Front: React / Back: Express.js, Node.js, MongoDB and AWS S3)

Surf Check

March 2021

- Designed and developed a full-stack web application (React, PHP and MySQL) to connect and help surfers share surf across the world.

uRadio

February 2020

- Designed and developed an Android application in Java, to allow users to stream radio stations of their choice from the app.

Fizzit

April 2020

- Designed and developed an e-commerce website where users can sell their old books, CDs and DVDs, using a LAMP stack.

SKILLS

Traits: Efficiency with a friendly voice, Teamwork, Punctual, Attentive, Adaptable, Keen to learn and improve
